

Dear Neighbors ,

I am writing to extend an invitation to a public meeting on Monday, December 8 at the Crossings of Colonie hosted by Waste Connections.

Waste Connections is taking a proactive approach to improving the Town of Colonie Landfill and would like to share the latest developments with the public. The Waste Connections team will also update the community on the development of Area 7 and where the New York State Department of Environmental Conservation stands regarding their process.

I've copied the agenda for the meeting below and if you have any further questions please do not hesitate to reach out to me at 518-951-9690.

Best,  
Donald Hallock
